EXPERIENCE

Shopify App Developer

ATTOMO Digital

- 01/2024 - 03/2025 Madrid, Spain
- Designed and developed merchant-centric Shopify apps using React, TypeScript, and Polaris components
 - Engineered robust REST and GraphQL integrations with Shopify Admin APIs and external services
 - Built a modular backend with Node.js, Express.js, and MongoDB to support flexible merchant data models
 - Implemented real-time data updates via webhooks and background job processors
 - Wrote unit and integration tests to ensure app reliability across deployments
 - Collaborated in a cross-functional squad including product managers and UI designers to ship high-impact features

Shopify & App Developer

Donde Search

- 08/2021 - 12/2023 New York, United States
- Created internal tools and Shopify-like dashboards using React, Express, and MongoDB
 - Developed automated workflows for inventory management and custom report generation
 - Connected Shopify store data via secure API endpoints and streamlined data handling pipelines
 - Enhanced user experience by implementing form validation, auto-complete inputs, and modals
 - Integrated mailing services and webhook-based alerts for merchant notifications

Senior Full Stack Developer

Línea gráfica

- 09/2019 - 07/2021 Sevilla, Spain
- Developed white-label Shopify app extensions for high-traffic e-commerce stores using React and Node.js
 - Integrated multiple GraphQL endpoints and custom webhooks for real-time event syncing
 - Built and maintained reusable React UI components aligned with Shopify Polaris for consistency
 - Optimized query performance in MongoDB using indexing and schema refactoring
 - Created a lightweight admin dashboard to manage app settings, analytics, and user permissions
 - Participated in weekly sprint planning, code reviews, and architecture design discussions

Frontend Engineer

XGenTech

- 04/2018 - 08/2019 New York, United States
- Built embedded UIs for Shopify merchants using React and TypeScript with Shopify Polaris
 - Developed real-time dashboards and analytics views based on merchant activity
 - Integrated REST APIs to manage app subscriptions, billing, and notification systems
 - Refactored legacy components into modular, reusable structures for better maintainability
 - Improved performance and usability across mobile and tablet devices through responsive design and lazy-loading strategies

SUMMARY

Full Stack Developer and Shopify Developer
I am a full-stack developer with 6+ years of experience focusing on building clean, scalable, and intuitive Shopify apps. I am skilled in React, experience designing simple yet powerful merchant TypeScript, Node.js, and MongoDB, and have experiences. I am skilled in API integrations and app architecture, and work across departments to transform product ideas into high-quality Shopify compatible features.

SKILLS

Backend Development

Node.js	Express.js	PHP	Laravel
Python	Flask	Django	

Frontend Development

HTML5	CSS3	JavaScript	React
Next.js	Vue.js	Tailwind CSS	

Database Management

PostgreSQL	MySQL	MongoDB
------------	-------	---------

Version Control

Git	GitHub
-----	--------

Frameworks

MERN Stack	LAMP Stack	Vite
------------	------------	------

EDUCATION

Bachelor of Science, Computer Science

Łódź University of Technology
09/2015 - 09/2017 Lodz, Poland

LANGUAGES

Polish
Native

English
